Professional Summary

Highly motivated and detail-oriented software developer with a strong foundation in Computer Science and a passion for Artificial Intelligence (AI) and Machine Learning (ML). Proficient in Python programming, with experience in building intelligent applications using modern frameworks such as LangChain, Retrieval-Augmented Generation (RAG), and vector databases. Proven ability to design, develop, and deploy scalable and maintainable software solutions.

Experience

SOFTWARE DEVELOPER (PART-TIME), GrandisTech Consultancy, June 2025 – Present

- Deliver scalable, maintainable, and high-quality software solutions across multiple client projects
- Contribute to technical decision-making, code quality, and overall project success.
- Developing full-stack AI products/systems for multiple clients using Python, LLMs, RAG, MCP and Vector Databases.
- Managing and maintaining user platforms for multiple clients.
- Debugging, reviewing and editing software codebases.

FULL STACK SOFTWARE DEVELOPER, GisTechke Ltd, 08/2022 – 03/2024

- Designed, developed, and maintained full-stack web applications for multiple client projects
- Built and integrated backend services, databases, Restful Application Programming Interfaces (APIs), and third-party systems
- Implemented responsive frontend interfaces and scalable backend logic using modern frameworks
- Supported cloud deployment, hosting, and maintenance of applications

- Optimized application performance, security, and scalability through refactoring and best practices
- Collaborated with clients and cross-functional teams to gather requirements and deliver solutions
- Diagnosed and resolved complex frontend and backend issues with minimal supervision

Skills

- Strong Python programming skills, especially in Artificial Intelligence (AI) and Machine Learning (ML) contexts
- Basic understanding of Large Language Models (LLMs) and prompt engineering
- Familiarity with LangChain, RAG pipelines, MCP and embedding concepts
- Experience working with APIs, including Restful APIs and GraphQL
- Knowledge of vector databases, such as Faiss and Pinecone
- Exposure to Java and Spring Boot for enterprise Application Programming Interface (API) integration
- Strong problem-solving and debugging skills
- Ability to learn new tools and frameworks rapidly

Education

- BACHELOR OF SCIENCE DEGREE IN COMPUTER SCIENCE, Maseno University, 2017-2021
- KENYA CERTIFICATE OF SECONDARY EDUCATION (KCSE), Ongata Senior School, 2013-2016
- KENYA CERTIFICATE OF PRIMARY EDUCATION (KCPE), Ongata Ronkai Primary School, 2005-2012

Projects

ResumeForger – AI Resume & Cover Letter Builder. Project Link: https://resumeforger-production.up.railway.app/

- Designed and developed a full-stack AI-powered web application that generates tailored, Applicant Tracking System (ATS)-friendly resumes and cover letters
- Integrated LangChain with the Groq Llama 3.3-70B model to generate personalized, professional documents
- Implemented secure user authentication and authorization using Flask-JWT-Extended

Masterspredict - Football Predictions Platform. Project Link: https://masterspredict.onrender.com/

- Developed a subscription-based football prediction platform providing both free and premium betting tips
- Designed a secure authentication system using JWT cookies and role-based access control
- Integrated multiple payment gateways, including Safaricom M-Pesa STK Push and PayPal.

Repurposify — AI-Powered Content Repurposer. Technologies: ***Flask*** **•** ***Groq (LLM)*** **•** ***LangChain*** **•** ***PostgreSQL*** **•** ***WeasyPrint*** **•** ***Bootstrap***

- Built a full-stack SaaS tool that automatically transforms long-form content (blogs, transcripts, podcasts) into multiple optimized formats (Twitter threads, LinkedIn posts, email newsletters, Instagram captions, YouTube descriptions, etc.).
- Implemented user authentication, tiered subscription system (Free/Pro), credit-based usage, and PDF export functionality.
- Added file upload support (PDF, DOCX, TXT) with text extraction and generation history.
- Deployed with Flask on Railway and integrated multiple payment gateways (Paystack & PayPal).

Referees

Available upon request.

- MR. James Wesonga, HR Manager, GrandisTech Consultancy
- MR. Dickson Angila, Senior Backend Engineer, GisTechke Ltd
- DR. McOyowo, Dean School of Computing and Informatics – Maseno University
